gymnasium

gymnasium

.....

The gymnasium is located in the building called inbarendi. It has a very high ceiling space peaking at 15 meters. With large areas of windows just below the roof line, there is an abundance of natural light coming into the gymnasium space.

It has numerous storage areas, heating and cooling, full amenities, change rooms, a kitchen facility and a separate gym.

For evening events stadium style halogen lighting is built into the roof space to provide excellent visibility whilst other styles of lighting can be achieved through consultation with technicians.

It is a versatile facility with a polished sprung wooden floor lined up for basketball, netball, badminton and volleyball. It has an international sized basketball court running north/south or two standard courts running east/west.

An electronically operated curtain is available to divide the court for simultaneous games and there are electronic scoreboards and shot clocks available. Team change rooms are on a Mezzanine level as is the viewing platform to the courts.

The high ceiling framework is able to support the hanging of various types of banners, as are the surrounding walls.
