multi purpose hall

multi purpose hall

The multi-purpose hall is a space located in the building called inbarendi. It has a very high ceiling space and with large areas of windows just below the roof line, there is an abundance of natural light.

For evening events stadium style halogen lighting is built into the roof space to provide excellent visibility whilst other styles of lighting can be achieved through consultation with technicians.

The high ceiling framework is able to support the hanging of various types of decorations, lighting, banners and lengths of lightweight fabrics.

The hall has a polished wooden floor and can accommodate up to 1400 seats in its main area and a further 100 seats on an overlooking mezzanine level.

When utilising the main area for a catered event, the facility can accommodate 500 seats, allowing room for a stage/performance space and dancing floor.

The hall has a kitchen facility for basic food preparation and warming on the ground floor and a food servery space situated on the mezzanine level. A bar counter on the ground floor provides for the serving of drinks in bottles and cans, and from kegs. Fridge facilities are also provided for drink and food storage.

Within the facility there are also toilet facilities, change rooms and some storage spaces that can be made available for short periods leading up to and following an event.

There is vehicular access into the hall from both ends of the building to support the loading and unloading of goods, as well as being suitable for positioning large displays, vehicles and equipment.

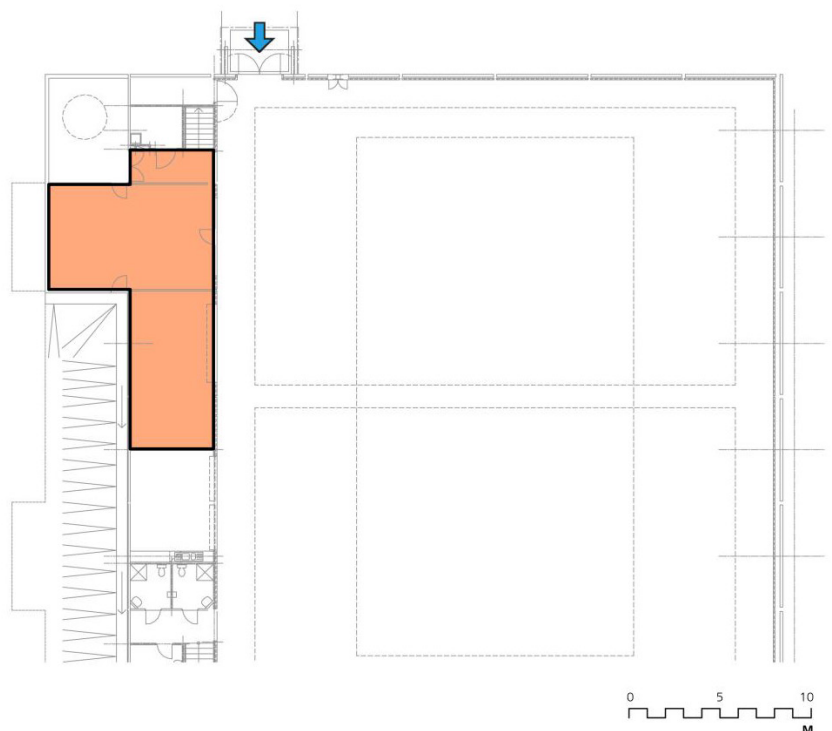

The access road coming into the College grounds gently winds its way to the front of the building providing for easy pick-up and drop-off of passengers, including large passenger vehicles such as buses.
