### music and dance studios

.....

The music and dance studios are housed in the Atelier building, a facility dedicated to the arts and creative pursuits. Upper and lower sections have been incorporated into the building design to take advantage of the natural slope of the site.

In the upper area, the facility accommodates 6 individual music tuition studios that range in size from 9 to 13 square metres. These are soundproofed and have their own climate control. They are very well suited to dedicated one-on-one tuition or can be just as effective with small groups for practice and training.

The facility also has a major music studio of 100 square metres which has a full glass wall overlooking the countryside and is well equipped for larger rehearsals. It is an exceptional practice space and is also equipped with a data projector and whiteboard.

In the lower area overlooking the freeway and adjoining hills face is the dance studio of 70 square metres. It is set up with a rubber based floor, wall mirrors and dance beams. It has its own climate control with dual outlets that provide highly efficient air flow throughout the space.

The dance studio also has its own external door and washroom which makes it a very accessible and individual space. It is designed to cater for group and private tuition, as well as general practice or rehearsals.
